Cabling

ProStrakan Plc

ProStrakan Plc is one of Europe's fastest growing specialty pharmaceutical companies engaging in the research, development and commercialisation of prescription medicines for the treatment of unmet therapeutic needs in major markets.

Boston Networks were commissioned to supply and install a structured cabling solution throughout ProStrakan's new Research & Development facility in Galashiels. Our BICSI Registered Communications Distribution Designer (RCDD) specified leading edge cabling and components in order to meet the high quality & bandwidth demands of the clients systems now and for the foreseeable future.

The installation of the network cabling solution was undertaken within a tight timeframe of 8 working days! Our highly skilled engineering resource was closely managed by an on site supervisor ensuring the project was completed on time and to the high quality standards expected at Boston Networks.
