IP Video Surveillance  
IP Door Access  
IP Intrusion Detection

## Boston Networks Deliver 'Advanced Security' For Lytham Primary Care

Lytham Primary Care Centre is located on the site of the former Lytham Hospital where there has been a health care presence since 1871. The new centre will accommodate the towns two existing GP practices alongside other health services including an endoscopy suite, X-Ray facilities, minor surgery and treatment suite.

The centre will significantly improve patient access to both primary and secondary care with outpatient services, physiotherapy, occupational therapy, health education and a health port for visiting mobile services.

Lytham Primary Care selected Boston Networks to install an advanced security system for the centre comprising of 60 IP CCTV cameras, IP access control & IP intruder detection, which gives the centre the ability to monitor exactly who goes where and when within the building. External security has also been installed to monitor access to the building and the staff & visitor car parks.
