'North Glasgow Wireless WAN'

Access North Glasgow is a community portal containing information on learning opportunities from a number of local education facilities including North Glasgow College, Anniesland College and Stow College.

North Glasgow currently has high speed broadband internet access between all of their learning centres and drop in locations thanks to a wireless radio network from Boston Networks Limited.

With a brief to provide a robust, high speed connection between 10 learning centres and the colleges, Boston Networks recommended a 5.8GHz radio network as the most cost effective, scalable and flexible solution.

Our ongoing tailored service level agreement provides maintenance and support services 24/7 giving North Glasgow true telecom's grade reliability.
